LK FUGA®Air forfradåser

Anvendelse

Dåserne anvendes til montage i hulrumsvægge. Dåserne kan monteres med LK FUGA®SOFT, CHOICE og PURE.

Dåserne kan sammenbygges såvel lodret som vandret. Dog er 1½ modul dåsen kun konstrueret til vandret sammenbygning med anden LK FUGA® 1½ modul dåse.

Alle dåserne leveres med to aflastninger pr. dåse.

Mærkelæren benyttes ved hul-udskæring med hulsav Ø57. De kan ved hjælp af dåsens klostykker monteres i pladetykkelser fra 9 til 39 mm.

Tilbehør

	Skillevæg for LK FUGA [®] Air 2 og 2½ modul dåser	504D7511
	Skrue for tekniske rammer	020S0516
OF	Kabelaflastning Ø5-11,5 mm	504D3001
	Mærkelære for LK FUGA [®] Air forfradåse	504D3000
	Vindtæt endestykke for 16 og 20 mm fleksrør	IMT35036 IMT35037

Kombinationsmuligheder

Tekniske data

Farve	Blå	
Rohs godkendelse	Ja	
Glødetrådsprøve	850° C	
Antal lednings-ender ved montage af lampeudtag monteret i 1 modul dåser	10 x 1,5 mm ² 5 x 2,5 mm ²	

Montage af 1 modul dåse

Målskitser

107

Montage af 1½ modul dåse

For at sikre dobbelt isolering ved sløjfning af ledninger, skubbes et stykke flexrør (Ø16 mm) med en længde på ca. 11 mm mellem dåserne.

Montage af 2+1 modul dåser
